Awards

Apr 2023 | DXC Technology
Best embedded project
Award: Headset

Apr 2024 | codbex
Best embedded project
Award: 3D printer

Experience

- 2022 - 2022
DXC Technology
Internship
Completed a two-week mini-internship after 11th grade where I learned HTML, CSS, Python, and Flask, gaining my first exposure to professional development. Worked on a team project to build a Flask app that retrieved and displayed online temperature data, strengthening my problem-solving skills and understanding of backend-frontend integration.
- 2024 - 2025
Meta Savages
Unreal Engine 5 Game Programmer
Gained hands-on experience in the gaming industry during my time at Meta Savages, where I collaborated with a talented team and worked in a professional development environment. Contributed to real-world projects involving Blueprint scripting, animation creation, and level design. This role strengthened my technical skills, exposed me to industry workflows, and introduced me to game development industry.

Education

- 2019 - 2024
Technological School
Electronic Systems
System Programming
Technology school "Electronic Systems" (TUES), is a specialised technology high school of key importance, associated with the Technical University of Sofia. Every year over a hundred students graduate from TUES with specialised diplomas in "Systems Programming" and "Computer Networks".
- 2024 - 2028
Technical University of Sofia (TU-Sofia)
Bachelor in Computer Science
The Technical University of Sofia (TU-Sofia) is a public university established in 1945 and is the largest engineering education and research center in Bulgaria. It offers a wide range of engineering programs and is known for its strong emphasis on research and innovation through industry collaborations. TU-Sofia also provides courses in English, German, and French, and has international partnerships through programs like Erasmus+ and the European University of Technology.
